PERSONAL PROJECTS

> Used PYTHON and IOT to develop "Automation Car Simulation" which is used for automation purpose that move the robot in right direction by the help of voice command. Artificial Intelligence and Python Script were used to implement the project

> Developed Hospital management project called "Hospital Management System" using PHP. This helps me to understand the workflow of Hospital applications.

> Developed a project "SHARPMIND INFO TRAIN" using C#.NET. This is an e-learning project that I did as an Intern at a company "Digital Empire India" This helped me to learn more about C#.NET and ASP.NET technologies.

SEMINAR

> "Automation Bluetooth Car" has done for the semester exam as a real project.

> ITC conference on "industry 2.0"

> TCS seminar on Artificial intelligence and deep learning.

> Attended a work shop on IOT and usage of python in artificial intelligence by and IBM executive.
