B.Tech Project :

Study of Microstructural and Mechanical Properties of High Nitrogen Steels (HNS): The project work is aimed at studying the microstructure, mechanical properties of high nitrogen stainless Steels. The microstructure of the welds was characterized by using Optical Microscope (Leica). Hardness is carried by using a Rockwell hardness testing machine. Mechanical Properties of welds are found to be inferior when compared to that of base Metal.

M.Tech Project :

Study on the effect of post weld heat treatments on AA1441 friction stir welds.
